You Can't Spank Your Children, But You Can Murder Them

By: Alan J. Huber

The liberals are nuts because Trump renamed the Gulf of Mexico, the Gulf of America. What did they rename? Columbus Day, Fort Benning, Fort Hood, the Washington Redskins, the Cleveland Indians, Aunt Jemima, Uncle Ben's, Land O'Lakes, felons, illegal aliens, women, fathers, and mothers. Get the picture?

It seems there's one case where a citizen may have been deported: Brian Mendez. As a baby, he moved to Mexico, and Mexican clerks probably entered his name incorrectly, which has caused confusion. He has been allowed to return to the United States pending an investigation.

When ICE arrests someone, agents have a handheld smartphone that takes the person's picture and checks it against other databases. They work very hard to make sure they don't get the wrong person.

Israel has signed a defense pact with Greece. I'm sure one of the unwritten agreements is that Greece will shut down on the antisemitism that has been happening there.

Over four days in August, 163 children were rescued by law enforcement in Florida. This should have been a top headline.

Europe has spent more than $8 billion buying defense technology from a country it has attacked for defending itself.

What is this $10 million grand jury report against DeSantis, Moody, and others? The money did not go to political campaigns. It went toward stopping the marijuana amendment. Was it questionable? Yes. Was it legal? Yes. Was it also a sealed report that was leaked. It happened in Tallahassee, so you know it was a Democratic leak.

Golda Meir said, "You cannot negotiate peace with someone who has come to kill you."

In 1944, an Ottoman census showed a Jewish majority of 60% living in Jerusalem.

On August 21, a federal judge ruled that Rubio could not enforce the 75-country immigrant visa suspension. So Rubio said, "Fine. I'll temporarily pause visa appointments worldwide." I love Rubio.

If you're threatened with being sent back to Haiti, you can leave for a different country before they come and get you. Only after you're arrested are we sending you back to Haiti. You're free to go anywhere else in the world.

If you have a Medicare Advantage plan and a billing problem with a healthcare provider, don't wait to call to turn it over to your insurance company. When you speak with the provider, tell him you why they are right. When the insurance company calls them, the information is totally different.

September 1, 1939, was the start of World War II and the Holocaust.

To those who are pro-choice: If you knew you were having a gay baby, could you abort it because it was gay?

The father of a Marine who was deported to Mexico and returned illegally was hoping that when his son turned 21, his son could help him get a green card. People have to learn that under Trump, certain things are inexcusable —such as crossing the border illegally after you have already been deported. We probably couldn't have gotten his green card under this system.

I think there will be two factors in the midterm elections. One is Republicans not voting. The other is Democrats crossing over because they think their party is crazy. This will make handicapping very difficult. If you can judge by early voting, this will be harder because you cannot predict crossover voters or Republicans voting on Election Day.

This is the second House vote this week that went against the Democrats. It shows the fracture within the Democratic Party. This wasn't a resolution; it was a law banning federal funds from going to colleges that boycott Israel. It should have been a no-brainer, but then again, the Democrats have no brains.

Gaza has more underground tunnels than the London subway system. Does that put it into perspective?

A pregnant celebrity mom is proud to announce that her unborn baby is trans.

What is it with the morons who want us to quit Iran? Their economy is collapsing. They are on fumes and are going to give up in a couple more months. It's not costing us anything, yet they want us to quit. Someone explain this to me.

The United States tripled the number of H1B visas in August. They try to talk the economy down, but the numbers say otherwise.

To all those who celebrate Rosh Hashanah, I wish you a healthy, sweet, prosperous, and healthy New Year. May the coming year bring peace to the world.

With God's help, I will be visiting Israel in May. I know that this year, I'll be able to go because Israel's enemies have all been defeated. It's the job that Trump and Netanyahu have done to make Israel a very safe place should be applauded. That is why we did what we did in the Middle East.

People ask me why I use AI. I was interviewed via a teleprompter app for my phone. I could have researched it for 30 to 60 minutes, or, in two minutes, AI gave me a better summary of my options and where to get them. That is just one example of how much time AI can save.

The Supreme Court ruled that political parties can buy ads at the lowest rate, just like political candidates. In reality, this is a major win for Republicans because their party has a whole lot more money than the Democrats. We'll see what that translates into.

After her mistrial, Lindsey Clancy is now a 2028 Democratic frontrunner.

I think Trump squeezing Iran economically is really working. But if he had not carried out the military operation, it would have had no effect.
And it's coming right before the midterms.

When you look at a chart of life expectancy and see the United States far down the list, understand the following: If a baby is born alive, lives for 10 minutes, and dies, it is counted as a live birth. It doesn't matter how premature the baby was. Other countries don't count it until the baby is a year old.

We also have a serious drug and overdose problem in this country. We have a Black male mortality issue, and the number of deaths in the African American community has a major effect on life expectancy. Hawaii doesn't have a comparable Black population. Factors like these are why our life expectancy looks lower.

If you want a fair comparison, compare a 65-year-old in the United States with a 65-year-old in the rest of the world and see how long each one lives.

Socialism for Dummies: Everything is free, but we're out of it.

They made a big deal when the USS Abraham Lincoln came into port with how rusty it looked. I guess all ships look that way after a long deployment. Then the contracted teams came out and removed all the rust. That's what happens when the media tells BS stories.

Nobody sees the 5:00 a.m. run. Nobody sees me choosing a salad over fries. Nobody sees me doing yoga in a peaceful, sunlit room. Why? Because I don't do any of that.

The people protesting data centers—don't they realize that the cloud is also a big building?

I don't understand why we're still having an abortion debate in this country, especially around rape and incest. Through 10 weeks, 97% of abortions can be done using medication. I know pro-lifers don't like this, but no one gets harassed while walking into a clinic. So please tell me why we're having this conversation as though it's still 1880.

Here is a conversation you'll see much more often: Assisted suicide is legal in Canada. In 2023, Ontario alone had 5,000 assisted suicides. The Orthodox rabbis of Ontario have decided that if you have an assisted suicide, you will not be permitted to be buried in a Jewish cemetery. Other problems and issues will arise. Most religions are going to have to deal with this. It will be interesting to see how it develops.

This is how bad fake news is becoming. I'm watching a video dated September 5, 2026, showing President Trump signing an executive order authorizing stimulus checks funded by tariffs. It is totally fake news—completely made up.

CBS report: An illegal immigrant was deported to a country in Africa that was not his home country and that he had never heard of.

The truth: He is from Venezuela. He told the immigration judge that he did not want to return to Venezuela, and the judge granted his request.

This is what passes for news.

A Gambian jihadist killed a pro-Palestinian gay man outside a gay bar in Tucson, Arizona. Keep freeing Palestine. It only gets you killed.

One reason rent in New York City is so high is because of professional tenants. They play the system and milk landlords out of more than $100,000 in rent over seven years, and there is nothing the landlords can do about it. So landlords raise the rent to cover it. Do you wonder why rents are so high?

Liberal logic: You can't spank your children, but you can murder them.

Elon has created $3 trillion in value through his companies and pays the salaries of 150,000 people.

Bernie helped create a $40 trillion national debt during his time in Congress and pays the salaries of zero people. Elon's wealth is not the problem. Bernie's communist policies are.

Woman: Men will never be able to understand postpartum psychosis.

Man: Didn't you also say that men can become women?

We have all seen the tagline on AI-generated stories: "Created by AI, which can make mistakes." What it means the entire story could be false and there is no recourse because of that disclaimer?

I write this on Labor Day. My grandfather was a union organizer. When I was a kid, some of my first trips were to the union hall. This is a salute to all those who fought and died for a day off, the eight-hour workday, workplace safety, and more.

Before he died, my grandfather said that when unions began asking for your birthday off, he thought that was the death of the unions. We shall see.

Now I have seen it all: a telephone receiver that plugs into the port on a cellphone so you can talk using a receiver. I guess people miss the feel of it.

The unemployment rate for people who have not been ruined by college degrees is at a 23-year low. The unemployment rate for people with degrees and advanced degrees is very high. But we're the dumb ones.

Meme of the Week:
I've been hiding from exercise. I'm in the Fitness Protection Program.

Bonus Meme of the Week:
Marriage is having one person who always knows the date and another who asks, "What day is it?"

Open Enrollment Start October 1st.

Everyone says October 15th, But on October 1st we can start talking about the new plans. So feel free to give us a call, And ask about the 2027 Medicare plans. Some are better...Some are worse...Some are canceled. But all over the U.S., we have your back.

Call or text 855-561-0500 or email
